Ponderosa Nature Resort has initiated a Schedule C Municipal Class Environmental Assessment (MCEA) for Improvements to the Water and Wastewater System. The purpose of the Study is to identify a preferred solution and design concept that provides a cost-effective and environmentally sound means of providing water supply, treatment and distribution and wastewater collection, treatment and disposal for Ponderosa with sufficient capacity to service existing and proposed facilities. Alternatives will be examined as part of the Study including the impacts of alternatives on the social, cultural, natural, and financial environment.

This PIC has been scheduled to allow all interested parties an opportunity to provide feedback on the project, including the alternative solutions being considered, evaluation of alternative solutions and preliminary preferred alternative. Public input is encouraged and will be given consideration during the planning and design of this project.

Please indicate your level of interest in the project below:

- I have no comments / concerns on the project
- My comments / concerns on the project are provided on this Comment Sheet

Please provide us with your Comments/Questions/Suggestions (additional space on back of page):
